

Location reference:	St Agnes and Gugh
Management Area reference:	MA46
Policy Development Zone:	PDZ18

PREFERRED POLICY TO IMPLEMENT PLAN:	
From present day (0-20 years)	NAI along all undefended cliff and cove shorelines. HTL around the south-west and north-west facing shorelines of the Big Pool area.
Medium term (20-50 years)	NAI along all undefended cliff and cove shorelines. HTL around the south-west and north-west facing shorelines of the Big Pool area.
Long term (50 -100 years)	NAI along all undefended cliff and cove shorelines. HTL around the south-west and north-west facing shorelines of the Big Pool area.

SUMMARY OF SPECIFIC POLICIES

Policy Unit		SMP1 Policy 50 yrs	SMP2 Policy Plan			Comment
			2025	2055	2105	
46.1	Tol Tuppens to Kittern Rock (Gugh)	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.2	Kittern Rock to The Hoe (Gugh)	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.3	The Hoe to the Bar (Gugh)	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.4	The Bar	Do nothing	NAI	NAI	NAI	Natural geomorphological feature connecting St Agnes and Gugh and should be managed under an no active intervention approach. May be subject to morphological change due to sea level rise. Should be monitored.
46.5	The Bar to Tol Tuppens	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.6	Kallimay Point to the Jetty	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.7	The Jetty to the Bar	Hold the line	NAI	NAI	NAI	No justification for entire hold the line along this frontage but NAI should not preclude local management of the quay and jetty structures to ensure

		50 yrs	2025	2055	2105	
						continued link to St Mary's.
46.8	The Bar to Tean Plat Point	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.9	Tean Plat Point to Long Point	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.10	Long Point to Pereglis slips	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.11	Pereglis Slips to Ginamoney Carn	Hold the line	HTL	HTL	HTL	Risk to the Big Pool from erosion and inundation and possible saline contamination of drinking water supply. Whilst this area provides main potable supply to the island the preferred policy would be to hold the line.
46.12	Ginamoney Carn to Browarth Point	Hold the line	HTL	HTL	HTL	Risk to the Big Pool from erosion and inundation and possible saline contamination of drinking water supply. Whilst this area provides main potable supply to the island the preferred policy would be to hold the line.
46.13	Browarth Point	Do nothing	NAI	NAI	NAI	No risks identified shoreline is resistant to erosion (generally less than 5m expected though this may be locally exceeded in places). No active intervention is preferred long term policy. Should satisfy objectives relating to AONB and Heritage Coast designations.
46.14	Browarth Point to Kallimay Point	Hold the line	NAI (with localised HTL)	NAI (with localised HTL)	NAI (with localised HTL)	Appears to be little justification to continue with HTL policy along this frontage. Erosion risks concluded to be very slight; therefore a no active intervention policy is preferred.
Key: HTL - Hold the Line, A - Advance the Line, NAI – No Active Intervention MR – Managed Realignment						

PREDICTED IMPLICATIONS OF THE PREFERRED PLAN

Policy Unit		Theme				
		Property & Land Use	Nature Conservation	Landscape	Historic Environment	Amenity & Recreational Use
46.1	Toi Tuppens to Kittern Rock (Gugh)	No property affected. Potential loss of cliff top area affecting land use in long term.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use. Erosion may cause some loss of current coast path positions.

			Ramsar designations.			
46.2	Kittern Rock to The Hoe (Gugh)	No property affected. Potential loss of cliff top area affecting land use in long term at Drognose Porth.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use. Erosion may cause some loss of current coast path position around Drognose Porth.
46.3	The Hoe to the Bar (Gugh)	Slight erosion adjacent to the Bar.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.4	The Bar	Slight erosion adjacent to the Bar.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.5	The Bar to Tol Tuppens	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.6	Kallimay Point to the Jetty	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.7	The Jetty to the Bar	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.8	The Bar to Tean Plat Point	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will	Landscape value would be supported along with the	Generally no impacts under the preferred	The preferred plan would not affect existing patterns of recreational use.

			support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	objectives of the Isles of Scilly AONB.	plan.	
46.9	Tean Plat Point to Long Point	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.10	Long Point to Pereglis slips	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.11	Pereglis Slips to Ginamoney Carn	Maintaining defences to the Big Pool are will help in managing risks to Island's fresh water supply.	The shoreline would continue to be modified by defences with natural coastal processes and nearshore habitats constrained.	Landscape would continue to be influenced by built defences and structures,	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.12	Ginamoney Carn to Browarth Point	Maintaining defences to the Big Pool are will help in managing risks to Island's fresh water supply.	The shoreline would continue to be modified by defences with natural coastal processes and nearshore habitats constrained.	Landscape would continue to be influenced by built defences and structures,	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.13	Browarth Point	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
46.14	Browarth Point to Kallimay Point	No implications.	Shoreline will be allowed to respond naturally to sea level rise. Generally the plan will support the objectives of the Isles of Scilly SAC, SPA and Ramsar designations.	Landscape value would be supported along with the objectives of the Isles of Scilly AONB.	Generally no impacts under the preferred plan.	The preferred plan would not affect existing patterns of recreational use.
