

Foreword

We all know Cornwall is a special place. We all have a responsibility for its future and proper planning is a key part of this.

To achieve our economic ambitions we must provide a set of policies that supports the creation of jobs and wealth.

This draft submission document is our proposed approach to development and sets out the policies we think should guide future planning decisions. We've heard views from extensive consultation with and the involvement of the community.

We also need to tackle issues such as the impact of climate change, the provision of affordable homes and renewable energy and managing waste as well as infrastructure while safeguarding the environment. We've made some tough decisions and made a plan for Cornwall that positively and pro-actively deals with change in the most sustainable way over the next 20 years.

We are positive about our future and, at its heart, this plan is for you and future generations, so it is important that you give us your thoughts. Please let us know by 22 April 2013. Are we doing the right thing, if not, what should we do?
