Ref: C.Q30.110 – Seeding/turfing

Title: Thickness of topsoil

Rev: 0
Date: May 2012

Thickness of topsoil - Essential elements

Seeding/turfing

All areas identified to be seeded or turfed shall be covered by either:

- A minimum thickness of 150mm undisturbed topsoil prepared as necessary so that it is in a suitable state for the cultivation operations specified for seeding and turfing

or

- A minimum thickness 150mm clean topsoil, provided and spread
