

Green Infrastructure for Growth – Saltmill Park, Saltash –
January 2019

Path alongside the football pitches re-graded to improve pooling of water

Areas prepared for wetland planting alongside the river's edge.

Wetland area alongside new path with plug plants

Weeping willow to frame the
Creekside area

Wetland close to the River
Tamar

Ragged robin already feeling at
home in Saltmill!

Large area planted with bulbs
to form a series of rivers of
flowers along the edge of the
park
