Green Infrastructure for Growth – Warfelton Fields, Saltash –  
January 2019

Before works, a classic field with a couple of football pitch areas and mown grass. Photo from early 2018.

EU sign installed

New path installed linking two car parks alongside the football pitches, planted with new trees along the top section.

Picnic table and large boulders installed to create new seating area with pollinator-friendly planting in surrounding beds

Shrubs planted to improve surrounds of car park and edges of the field

Benches installed at strategic locations around field to improve seating for people to watch football

Wildflower meadow on roadside beside lower car park

Trees planted along entire boundary to create sense of place while keeping the football pitches intact.

New hedge planted along ugly concrete wall enclosing Saltash Football Club. This will be a huge improvement once the hedge has taken.

Large pollinator-friendly bed planted at the base of the corner slope
