Climate Vision

Make a difference – make a pledge or two

I run Climate Vision, a social enterprise by accident, having completed two climate change degrees in Falmouth and jumping straight into a project having been asked to mobilise the people of Cornwall into cutting carbon emissions.

From my experience and studies, it was clear we needed to be able to HELP people to engage with the hard-core RISKS of climate change, EASILY, by knowing about WHAT changes it, what are natural changes and supporting the difference through changing every day HABITS.

So, most of my research was about ‘how do you do that then?!’ Six years of reading academics tests and trials enabled the concise, user friendly, built for anyone; 10 pledges.

The artwork/report/online pledge system is FREE to any business.

Key to getting staff on board to help businesses and organisations to GET READY for the future, leaders will benefit from 'show and telling' the way *and then* inviting their staff to do the 10 pledges online.

<https://climatevision.co.uk/top-ten-pledges>

Good luck!

p.s. Any business leader evidencing how they demonstrated to their staff how they got on

with all 10 Pledges will be entitled to a free 45 minute Flood Risk Snapshot for their business.

Please get in touch through the pledge link above.
