

FASTER AND SLOWER

HOW WILL THIS PROJECT AFFECT EXISTING ROADS?

Creating a new road will reduce the number of cars driving through your community, but less traffic could mean that some drivers will speed up.

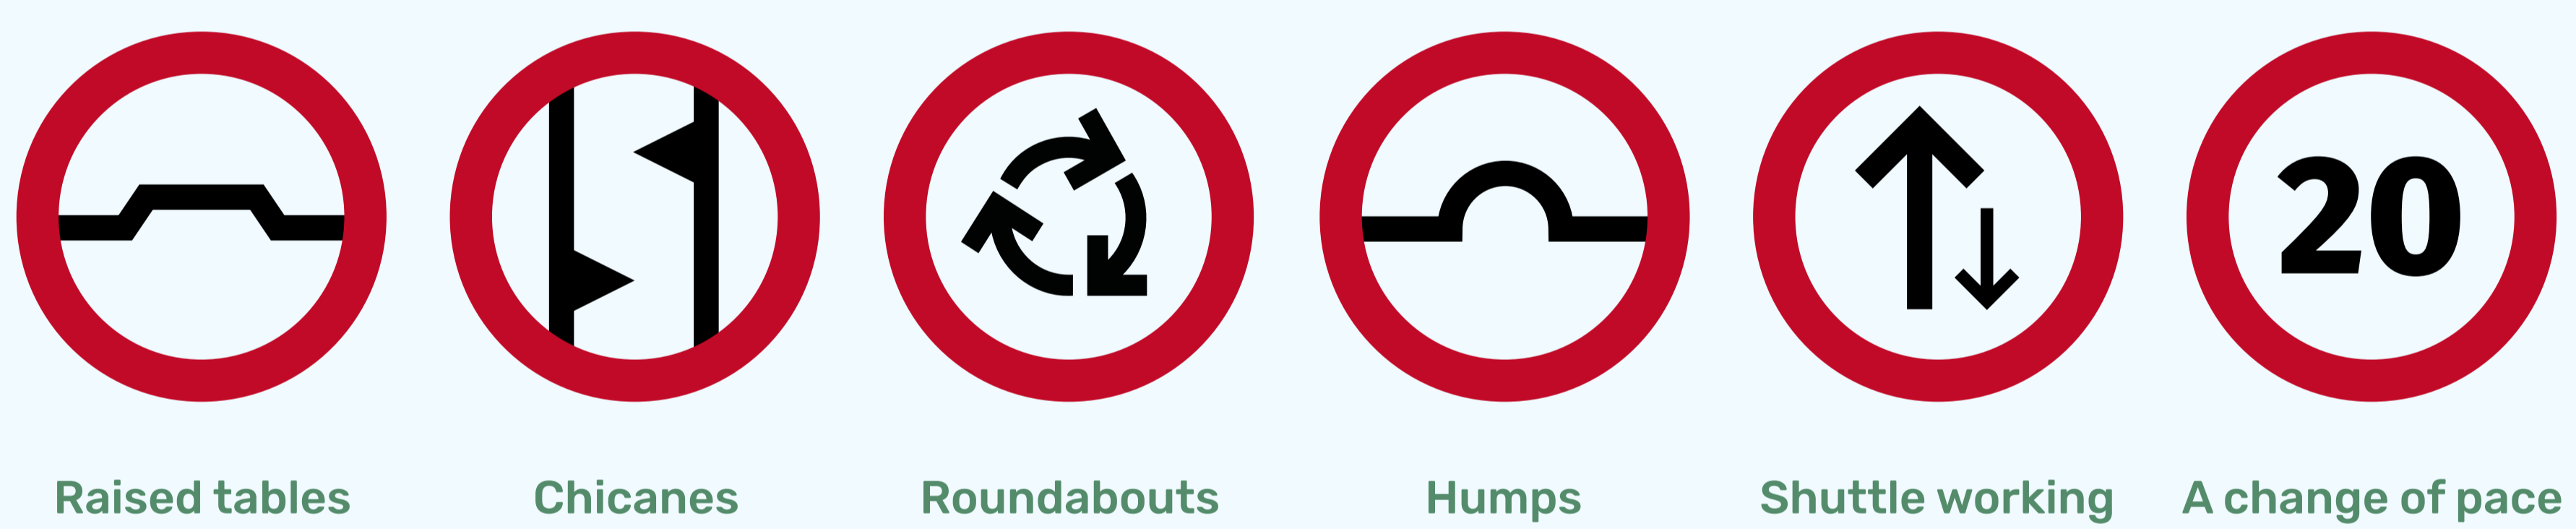

As part of the investment in the road, we will need to provide traffic calming for the local communities that may experience faster traffic flow.

Play our Faster and Slower game to see how this works.

WHAT DOES TRAFFIC CALMING LOOK LIKE?

There are lots of ways to slow traffic down some of the most frequently used are:

Raised tables

Chicanes

Roundabouts

Humps

Shuttle working

A change of pace

COULD THIS BE A CHANCE TO ENHANCE THE SURROUNDINGS?

Small changes to existing traffic routes could offer the opportunity to enhance local places – by providing benches to sit on, using planters and flower beds to create colour and texture; and the renewal of pocket spaces that provide interest and character.
