The plan led system provides the best way of achieving this objective as set out in Policy 3 of this Plan. The Plan and the Allocations Document and Neighbourhood Plans that follow will identify sufficient land to meet those needs locally but also seeks to ensure a focus upon previously developed land and the protection of the countryside for its own sake.</u></p> <p><u>The countryside's importance ranges from its value as agricultural land, for its landscape value, its biodiversity and historic character. While significant areas of greenfield land will be required to meet future needs this will be provided in the main towns by allocations."</u></p>	To ensure the countryside is protected for its own sake and to ensure a plan led approach to major development through allocations.

A key aim of that work will be to prioritise resources for flood risk management projects, maximise funding and join resources in the most efficient and effective way. Potential funding opportunities identified through the Local Strategic Investment Plan, the Local Enterprise Partnership and a future Community Infrastructure Levy will be important in the context of managing flood risk”</u></p>	To provide clarity on roles in respect of flood risk management and highlight the need for a collaborative approach to funding associated infrastructure.

47	44	Policy 26 (2) (a)	That Policy 26(2)(a) be amended to read:	To clarify that increasing flood
