

Towan Blystra Road, Newquay

On 14 March 2020, the Building Communities through Nature project arranged a workshop to allow local people to contribute their views on the open space. This information was then analysed before the design for the Making Space for Nature scheme was devised.

## You said, we did –

Of course people have different views and opinions and unfortunately we can't do everything everyone wants. We have read and considered all of the comments; we can't reply to them all but these are some comments and changes we made.

**You said** - There were concerns that too many changes would reduce the amount of space for playing football and other games.

**We did** – We have kept the recreational space and only made changes around the edges.

**You said** – You would like a barrier to stop balls going into road, also to help children running into road.

**We did** – Boulders, soil mounds and low trees will be planted at the edge of the site on the road side.

**You said** – You wanted an entrance to the space from Wildflower Lane.

**We did** – Formalised the entrance to the green from Wildflower Lane and marked the entrance with new trees.

**You said** – “it's a great idea, but it must be maintained”.

**We did** – The suggested planting for this area is as low maintenance as possible with bulbs meadows and trees. Cornwall Council has committed to maintaining the new planting until at least 2036.
