

Green Infrastructure for Growth – Goldsworthy Drive Bude –
June 2019

Goldsworthy Drive
open space started as
a large expanse of
amenity grass with a
solitary goal post for
entertainment

New shrub borders and
meadow areas give the
space shape, texture
and colour

A bee village was
installed and planted
up with pollinator
friendly shrubs for bees
to forage

Bee posts provide nesting opportunities for solitary bees

Dormice have been recorded in the surrounding area so 6 dormice boxes were installed in some of the larger trees

UNIVERSITY OF
EXETER

Spring saw native
bluebells and wild
garlic bulbs in flower

Native hedge plant is
doing well in the midst
of one of the meadow
areas.

16 June saw the first
bioblitz for the project.
A couple of families
brought their kids to
have a go.

Development Fund

A couple of
horsewomen stop to
ask about the Bioblitz
and the new works that
have taken place in
Bude

Picnic tables are
proving popular with
visitors who can study
the interpretation panel
while relaxing in the
sun
