Lifeline and Assisted Living

The new Footprint with location technology

Footprint is a GPS tracker with SOS button and two-way communication. It pinpoints the location of the wearer, and provides two-way hands-free conversation through the built-in speaker.

The user can call for help when needed or we can keep an eye on the user and be automatically alerted if they leave a pre-defined (or geo-fenced) area.

To call for help, the user holds down the button for three seconds. The Footprint then calls the Lifeline 24/7 monitoring centre in Truro who answers the call, showing the GPS location.

From just £6.50 a week (ex VAT)
plus a one-off charge of £19.00 for
delivery and set up of the device

Features:

- **Mobile telecare device** - No need for a landline and you can call for help out and about
- **Assistance button** - Opening up a two way conversation
- **SMS text messaging** - SMS text message sent to contacts simultaneously and shows the location and speed of the device and the alert type
- **Alert types** - Assistance alert (by pressing button) and or / Geographic alert (when leaving or entering a specific area)
- **Incoming calls** - Footprint can receive incoming calls
- **Roaming SIM** - The device will work on all the major UK Networks

Lifeline and Assisted Living

The new OwnFone Mobile

The ability to contact people, and to be contacted, at the press of a button offers great peace of mind which is so important, especially for older or vulnerable people.

Some people simply don't want the added complications of a modern day smartphone.

Our OwnFone Mobile handset allows the user to make calls to a dedicated pre-programmed number. And that's it. No complications, no unnecessary functions and no need for lengthy user guides.

Features:

- **Mobile telecare device** - Roaming Sim works on all UK networks. No need for a landline and you can call for help when out and about
- **Easy to use** - To make a call just press the button
- **Small and light** - Credit card sized, weighs only 40g
- **Non stigmatising** - Looks very different from a red button alarm
- **Wearable** - We supply a colour matched lanyard with every OwnFone
- **Safe and secure** - The OwnFone only calls the Lifeline 24/7 alarm monitoring centre in Truro
- **Ready to use** - OwnFone arrives ready to use

From just £5.00 a week (ex VAT)
plus a one-off charge of £19.00 for
delivery and set up of the device
